

Legionella Webinar: Exploring National Guidance and Local Experiences

May 30, 2018 | 1:00 - 2:00 PM EDT

Legionnaires' disease is a respiratory disease caused by Legionella bacteria, which can be found in large water systems. In 2016, there were an estimated 6,100 cases of Legionnaires' disease in the United States.

NACCHO invites you to learn more about Legionella and the available resources and recommendations for protecting your community.

SPEAKERS:

- **Laura Cooley**, MD, MPHTM, Medical Epidemiologist, CDC
- **Jasen Kunz**, MPH, REHS, Environmental Health Officer, CDC
- **Alana Sulka**, MPH, RN, CPH, Director of Epidemiology & Infectious Diseases, Gwinnett, Newton, and Rockdale County Health Departments
